"We believe that we shall succeed only if we understand and cater to our customer's needs and satisfaction, and we assure you that with our highly qualified and experienced staff we are able to perform sourcing personnel of best quality to meet and exceed to our client's expectations".

CIVIL WORKS

Civil Construction is one of the oldest jobs in the world, **AFJ** specializes in various types of Civil works. What makes us unique and stands out in the midst of our competitors is the drive and commitment we foster and enhance in providing quality and reliable service, efficient and effective project management expertise, guaranteed completion dates and meeting production set targets.

We are backed by a team of professionals who are dedicated towards providing satisfaction to our esteemed clients and committed to business excellence. Quality in design and construction is the hallmark of our creations in this field

At **AFJ** we undertake following Civil related projects:

SERVICES AND SCOPE OF WORK

Civil Contracts

Building Construction / Manholes / Foundations

Manual Excavation / Cable Laying / Compaction

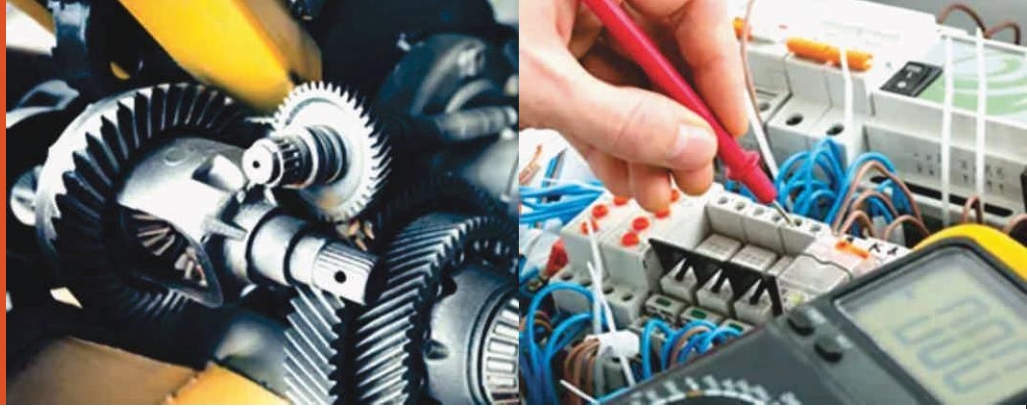

Refurbishing and Maintenance

Plumbing Installations and Maintenance

Fire Fighting Solutions

ELECTRICAL & MECHANICAL WORKS

AFJ provides solution to its clients in the disciplines of their Electrical and Mechanical needs.

AFJ undertakes work on **Electrical** systems such as motor control and power transmission, as well as utilizing electricity to transmit energy in Industrial and Oil and Gas plants. We undertake Conducting, Layout, Installation, Termination, Labeling related to Cabling Projects.

Our **Mechanical** Engineers are involved in the design, development, installation and maintenance of mechanical rotating plants, along with equipment, machinery e.g. pumps, engines, turbines, which are used for processing and producing oil and gas. We also undertake Mechanical Piping jobs.

INDUSTRIAL MATERIAL SUPPLIERS

AFJ supplies materials related to the oil, gas and petrochemical industries. We arrange industrial materials like carbon stainless steel, pipes, tubes, valves, flanges, fittings, expansion joints, gaskets, bolts and nuts, etc.

We have an extensive range of materials and products for Civil, Mechanical, Electrical, Instrumentation, Piping, Cables, Safety Equipment's along with Hand Tools, Power Tools, Welding Machines and a range of Power Tool Accessories as well as essential supplies required in Plants and Industries.

RENTAL EQUIPMENTS

In order to cater services under one Umbrella we ease search for our customers by arranging rental services and providing equipment rental related solutions and value-added services to our clients. We focus on construction, E&M engineering equipments which include Heavy Cranes, Excavators, Dumpers, Forklifts, JCB, Graders, Trailers, Shovels, Coasters etc.

Being a Medium size unit gives us the ability to have a quick response and the flexibility to respond to our client's direct needs and access to resources which enables us to undertake any project according to our capacity.

SCAFFOLDING WORKS

When it comes to construction, maintenance and repair work, scaffolding is temporarily built around the periphery of a construction site to provide workers access to the top, as well as in areas which is hard-to-reach. Buildings today are huge and complex architectural projects, which need scaffolding in place before construction can start. This scaffolding not only assists with the edifice, but also protects pedestrian traffic from injury. Therefore, much like the specialized Engineers, Carpenters, Masons, Electricians etc., working on the building, it too requires a set of professionals to Erect, Alter, dismantle a temporary structure to support a platform, these professional erectors are called Scaffolders, at **AFJ** we undertake Scaffolding projects which is accomplished by our highly trained professional Scaffolders. We custom design scaffolding to client as per their construction-specific needs.

SCRAP BUYING AND SELLING

AFJ is also engaged in Scrap buying and selling business. We deal in various types of Scraps like Iron, Copper, Aluminum, Stainless Steel, Zinc, Electric Cables scrap, Nickel Scrap and Wooden scrap

We purchase scrap materials mainly from Industrial plants, sick units and from Oil and Gas plants.

HOW IT WORKS

ENQUIRY

Our Customers / Clients either call or forward us enquiry for available scrap materials with them.

VISIT

We visit to our Customer / Client's location and finalize the deal on the spot if the materials are profitable and suit our budget.

PAY & PICKUP

Once the deal is finalized and both the parties agree upon terms and conditions mutually, we make the payment on agreed terms and load the scrap materials accordingly.
